

1. Crear categorías y ajustar productos

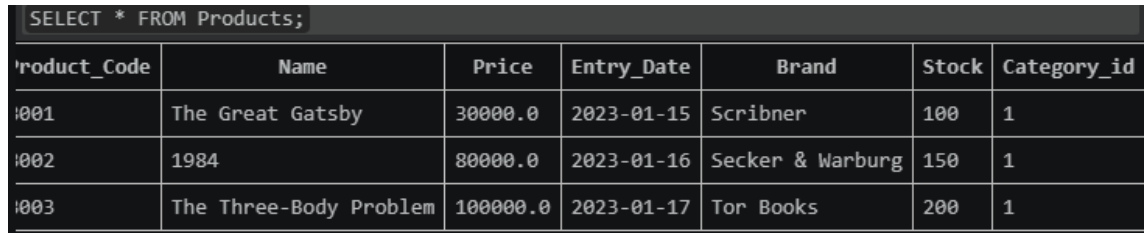

-Cree la tabla categories con:

- id (PK autoincrement)
- name (UNIQUE, NOT NULL)
- description

Categories
id : integer
name : varchar...
description : ...

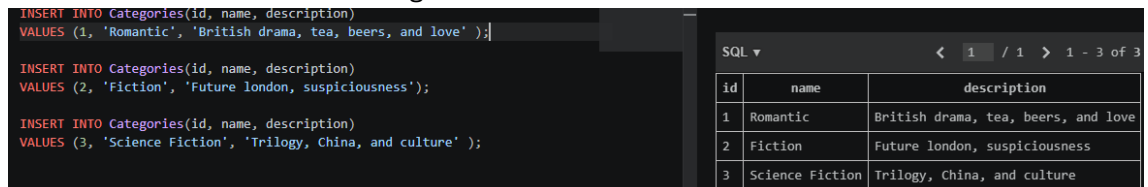

-Agregue a products la columna category_id (INTEGER, puede permitir NULL)

```
SELECT * FROM Products;
```

Product_Code	Name	Price	Entry_Date	Brand	Stock	Category_id
B001	The Great Gatsby	30000.0	2023-01-15	Scribner	100	1
B002	1984	80000.0	2023-01-16	Secker & Warburg	150	1
B003	The Three-Body Problem	100000.0	2023-01-17	Tor Books	200	1

-Inserte al menos 3 filas en categories

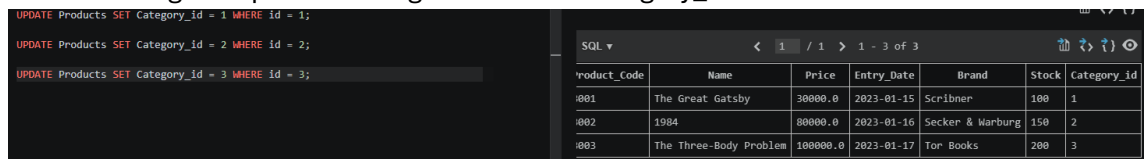

```
INSERT INTO Categories(id, name, description)
VALUES (1, 'Romantic', 'British drama, tea, beers, and love' );

INSERT INTO Categories(id, name, description)
VALUES (2, 'Fiction', 'Future london, suspiciousness');

INSERT INTO Categories(id, name, description)
VALUES (3, 'Science Fiction', 'Trilogy, China, and culture' );
```

id	name	description
1	Romantic	British drama, tea, beers, and love
2	Fiction	Future london, suspiciousness
3	Science Fiction	Trilogy, China, and culture

-Actualice algunos products asignándoles un category_id

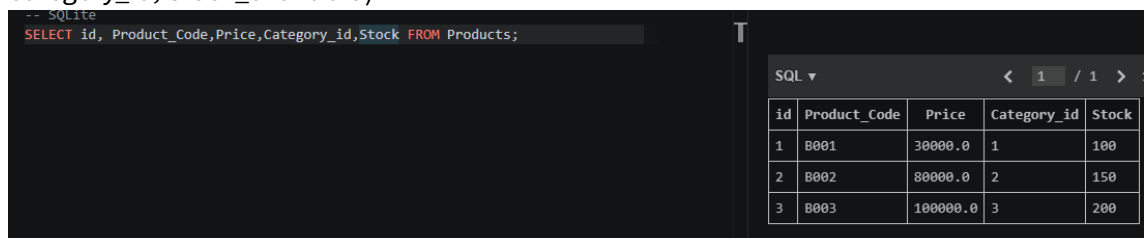

```
UPDATE Products SET Category_id = 1 WHERE id = 1;

UPDATE Products SET Category_id = 2 WHERE id = 2;

UPDATE Products SET Category_id = 3 WHERE id = 3;
```

Product_Code	Name	Price	Entry_Date	Brand	Stock	Category_id
B001	The Great Gatsby	30000.0	2023-01-15	Scribner	100	1
B002	1984	80000.0	2023-01-16	Secker & Warburg	150	2
B003	The Three-Body Problem	100000.0	2023-01-17	Tor Books	200	3

-Verifique con SELECT * FROM products (muestre id, product_name, price, category_id, stock_available)

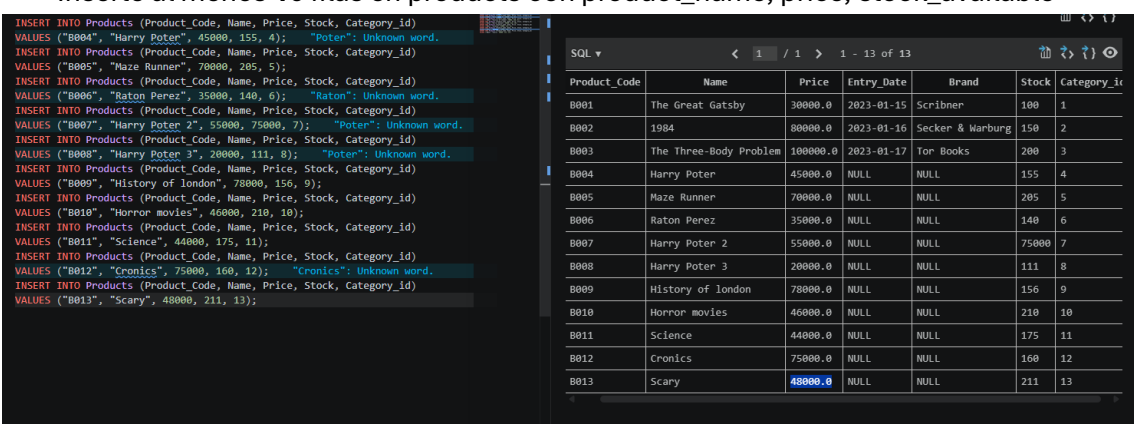

```
-- SQLite
SELECT id, Product_Code, Price, Category_id, Stock FROM Products;
```

id	Product_Code	Price	Category_id	Stock
1	B001	30000.0	1	100
2	B002	80000.0	2	150
3	B003	100000.0	3	200

2. Carga de productos y filtros básicos

Inserte al menos 10 filas en products con product_name, price, stock_available

```
INSERT INTO Products (Product_Code, Name, Price, Stock, Category_id)
VALUES ('B004', 'Harry Potter', 45000, 155, 4);
INSERT INTO Products (Product_Code, Name, Price, Stock, Category_id)
VALUES ('B005', 'Maze Runner', 70000, 205, 5);
INSERT INTO Products (Product_Code, Name, Price, Stock, Category_id)
VALUES ('B006', 'Raton Perez', 35000, 140, 6);
INSERT INTO Products (Product_Code, Name, Price, Stock, Category_id)
VALUES ('B007', 'Harry Potter 2', 55000, 75000, 7);
INSERT INTO Products (Product_Code, Name, Price, Stock, Category_id)
VALUES ('B008', 'Harry Potter 3', 20000, 111, 8);
INSERT INTO Products (Product_Code, Name, Price, Stock, Category_id)
VALUES ('B009', 'History of London', 70000, 156, 9);
INSERT INTO Products (Product_Code, Name, Price, Stock, Category_id)
VALUES ('B010', 'Horror movies', 40000, 210, 10);
INSERT INTO Products (Product_Code, Name, Price, Stock, Category_id)
VALUES ('B011', 'Science', 44000, 175, 11);
INSERT INTO Products (Product_Code, Name, Price, Stock, Category_id)
VALUES ('B012', 'Cronics', 75000, 160, 12);
INSERT INTO Products (Product_Code, Name, Price, Stock, Category_id)
VALUES ('B013', 'Scary', 48000, 211, 13);
```

Product_Code	Name	Price	Entry_Date	Brand	Stock	Category_id
B001	The Great Gatsby	30000.0	2023-01-15	Scribner	100	1
B002	1984	80000.0	2023-01-16	Secker & Warburg	150	2
B003	The Three-Body Problem	100000.0	2023-01-17	Tor Books	200	3
B004	Harry Potter	45000.0	NULL	NULL	155	4
B005	Maze Runner	70000.0	NULL	NULL	205	5
B006	Raton Perez	35000.0	NULL	NULL	140	6
B007	Harry Potter 2	55000.0	NULL	NULL	75000	7
B008	Harry Potter 3	20000.0	NULL	NULL	111	8
B009	History of London	70000.0	NULL	NULL	156	9
B010	Horror movies	40000.0	NULL	NULL	210	10

B012	Cronics	75000.0	NULL	NULL	160	12
B013	Scary	48000.0	NULL	NULL	211	13

Seleccione todos los producto

```
SELECT * FROM Products
ORDER BY Name ASC;
```

SQL ▾							
< 1 / 1 > 1 - 13 of 13							
id	Product_Code	Name	Price	Entry_Date	Brand	Stock	Category
2	B002	1984	80000.0	2023-01-16	Secker & Warburg	150	2
12	B012	Cronics	75000.0	NULL	NULL	160	12
4	B004	Harry Potter	45000.0	NULL	NULL	155	4
7	B007	Harry Potter 2	55000.0	NULL	NULL	75000	7
8	B008	Harry Potter 3	20000.0	NULL	NULL	111	8
9	B009	History of london	78000.0	NULL	NULL	156	9
10	B010	Horror movies	46000.0	NULL	NULL	210	10
5	B005	Maze Runner	70000.0	NULL	NULL	205	5
6	B006	Raton Perez	35000.0	NULL	NULL	140	6
13	B013	Scary	48000.0	NULL	NULL	211	13
11	B011	Science	44000.0	NULL	NULL	175	11
1	B001	The Great Gatsby	30000.0	2023-01-15	Scribner	100	1
3	B003	The Three-Body Problem	100000.0	2023-01-17	Tor Books	200	3

Seleccione productos con price > 50000

```
SELECT Price from products
WHERE Price > 50000;
```

SQL ▾	
Price	
80000.0	
100000.0	
70000.0	
55000.0	
78000.0	
75000.0	

Seleccione productos cuyo product_name contenga la palabra “apple” usando LIKE

No existe ninguna línea que empiece o termine con la palabra “apple”

```
SELECT * FROM Products
WHERE Name LIKE "%apple%";
```

SQL ▾							
< 1 / 1 > 1 - 0 of 0							

Sin embargo, si busco “On” sí, los porcientos al inicio y al final indican que la palabra a filtrar aparezca tanto al inicio como al final de la línea a buscar

```
-- SQLite
SELECT * FROM Products
WHERE Name LIKE "%on%";
```

SQL ▾							
< 1 / 1 > 1 - 3 of 3							
id	Product_Code	Name	Price	Entry_Date	Brand	Stock	Category_id
6	B006	Raton Perez	35000.0	NULL	NULL	140	6
9	B009	History of london	78000.0	NULL	NULL	156	9
12	B012	Cronics	75000.0	NULL	NULL	160	12

Liste los 5 productos más caros con ORDER BY price DESC LIMIT 5

```
SELECT *FROM Products
ORDER BY Price DESC
LIMIT 5;
```

id	Product_Code	Name	Price	Entry_Date	Brand	Stock	Category
3	B003	The Three-Body Problem	100000.0	2023-01-17	Tor Books	200	3
2	B002	1984	80000.0	2023-01-16	Secker & Warburg	150	2
9	B009	History of london	78000.0	NULL	NULL	156	9
12	B012	Cronics	75000.0	NULL	NULL	160	12
5	B005	Maze Runner	70000.0	NULL	NULL	205	5

3.Correcciones de datos en productos

Establezca stock_available = 0 donde price <= 0

```
UPDATE Products
SET Stock = 0
WHERE Price <= 0;
```

id	Product_Code	Name	Price	Entry_Date	Brand	Stock	Category
1	B001	The Great Gatsby	30000.0	2023-01-15	Scribner	100	1
2	B002	1984	80000.0	2023-01-16	Secker & Warburg	150	2
3	B003	The Three-Body Problem	0.0	2023-01-17	Tor Books	0	3
4	B004	Harry Potter	45000.0	NULL	NULL	155	4
5	B005	Maze Runner	70000.0	NULL	NULL	205	5
6	B006	Raton Perez	0.0	NULL	NULL	0	6
7	B007	Harry Potter 2	55000.0	NULL	NULL	75000	7
8	B008	Harry Potter 3	20000.0	NULL	NULL	111	8
9	B009	History of london	78000.0	NULL	NULL	156	9
10	B010	Horror movies	46000.0	NULL	NULL	210	10
11	B011	Science	44000.0	NULL	NULL	175	11
12	B012	Cronics	75000.0	NULL	NULL	160	12
13	B013	Scary	48000.0	NULL	NULL	211	13

Aumente el price en 100 unidades para todos los productos cuando stock_available sea menor a 10

```
UPDATE Products
SET Price = Price+100
WHERE Stock < 10;
```

Product_Code	Name	Price	Entry_Date	Brand	Stock	Category
B001	The Great Gatsby	30000.0	2023-01-15	Scribner	100	1
B002	1984	80000.0	2023-01-16	Secker & Warburg	150	2
B003	The Three-Body Problem	100.0	2023-01-17	Tor Books	0	3
B004	Harry Potter	45000.0	NULL	NULL	155	4
B005	Maze Runner	70000.0	NULL	NULL	205	5
B006	Raton Perez	100.0	NULL	NULL	0	6

Disminuya stock_available en 1 para un product_id específico

```
UPDATE Products
SET Stock = Stock - 1
WHERE id = 7;
```

Product_Code	Name	Price	Entry_Date	Brand	Stock	Category
B001	The Great Gatsby	30000.0	2023-01-15	Scribner	100	1
B002	1984	80000.0	2023-01-16	Secker & Warburg	150	2
B003	The Three-Body Problem	100.0	2023-01-17	Tor Books	0	3
B004	Harry Potter	45000.0	NULL	NULL	155	4
B005	Maze Runner	70000.0	NULL	NULL	205	5
B006	Raton Perez	100.0	NULL	NULL	0	6
B007	Harry Potter 2	55000.0	NULL	NULL	114	7
B008	Harry Potter 3	20000.0	NULL	NULL	111	8
B009	History of london	78000.0	NULL	NULL	156	9
B010	Horror movies	46000.0	NULL	NULL	210	10
B011	Science	44000.0	NULL	NULL	175	11
B012	Cronics	75000.0	NULL	NULL	160	12
B013	Scary	48000.0	NULL	NULL	211	13

Verifique con **SELECT * FROM products ORDER BY id ASC LIMIT 10**
